BODIPURE®

The Innovative Leader

Bodipure was founded over 30 years ago with a mission to develop high quality professional spa products. The first spa pedicure line included foot scrubs and foot polish. Over the years, the company has expanded into additional lines of body products which include massage creams and oils, body bath, mud and lotions, and hand and foot treatments.

- 1996 - Bodipure developed the first baking soda products using the pure natural mineral in its Miracle Scrub Baking Soda foot and body scrubs.
- 2010 - Bodipure created the breakthrough Keratin Gloves & Socks, the first and only waterless hand and foot treatment to incorporate keratin, a natural protein found in hair, skin and nails. Keratin Gloves & Socks are now a favorite treatment of nail professionals worldwide.
- 2015 - HandPure Hand Mask was created as a premium anti-aging and moisturizing hand treatment.

Bodipure is proud to be an innovator in skincare products, relying on the intrinsic healthy properties of natural ingredients such as green tea, peppermint, eucalyptus, milk and baking soda. Bodipure continues to develop new products to stay ahead of the curve in creating a more diverse line of healthy skincare treatments.
